

Nepal Climate Hub

Nepal Climate Hub (NCH) is a centralized platform built to educate, connect, and empower Nepal's young people to take positive climate action.

- UI/UX Design
- Responsive Design
- Web Design
- Social Media Design

Tool used:

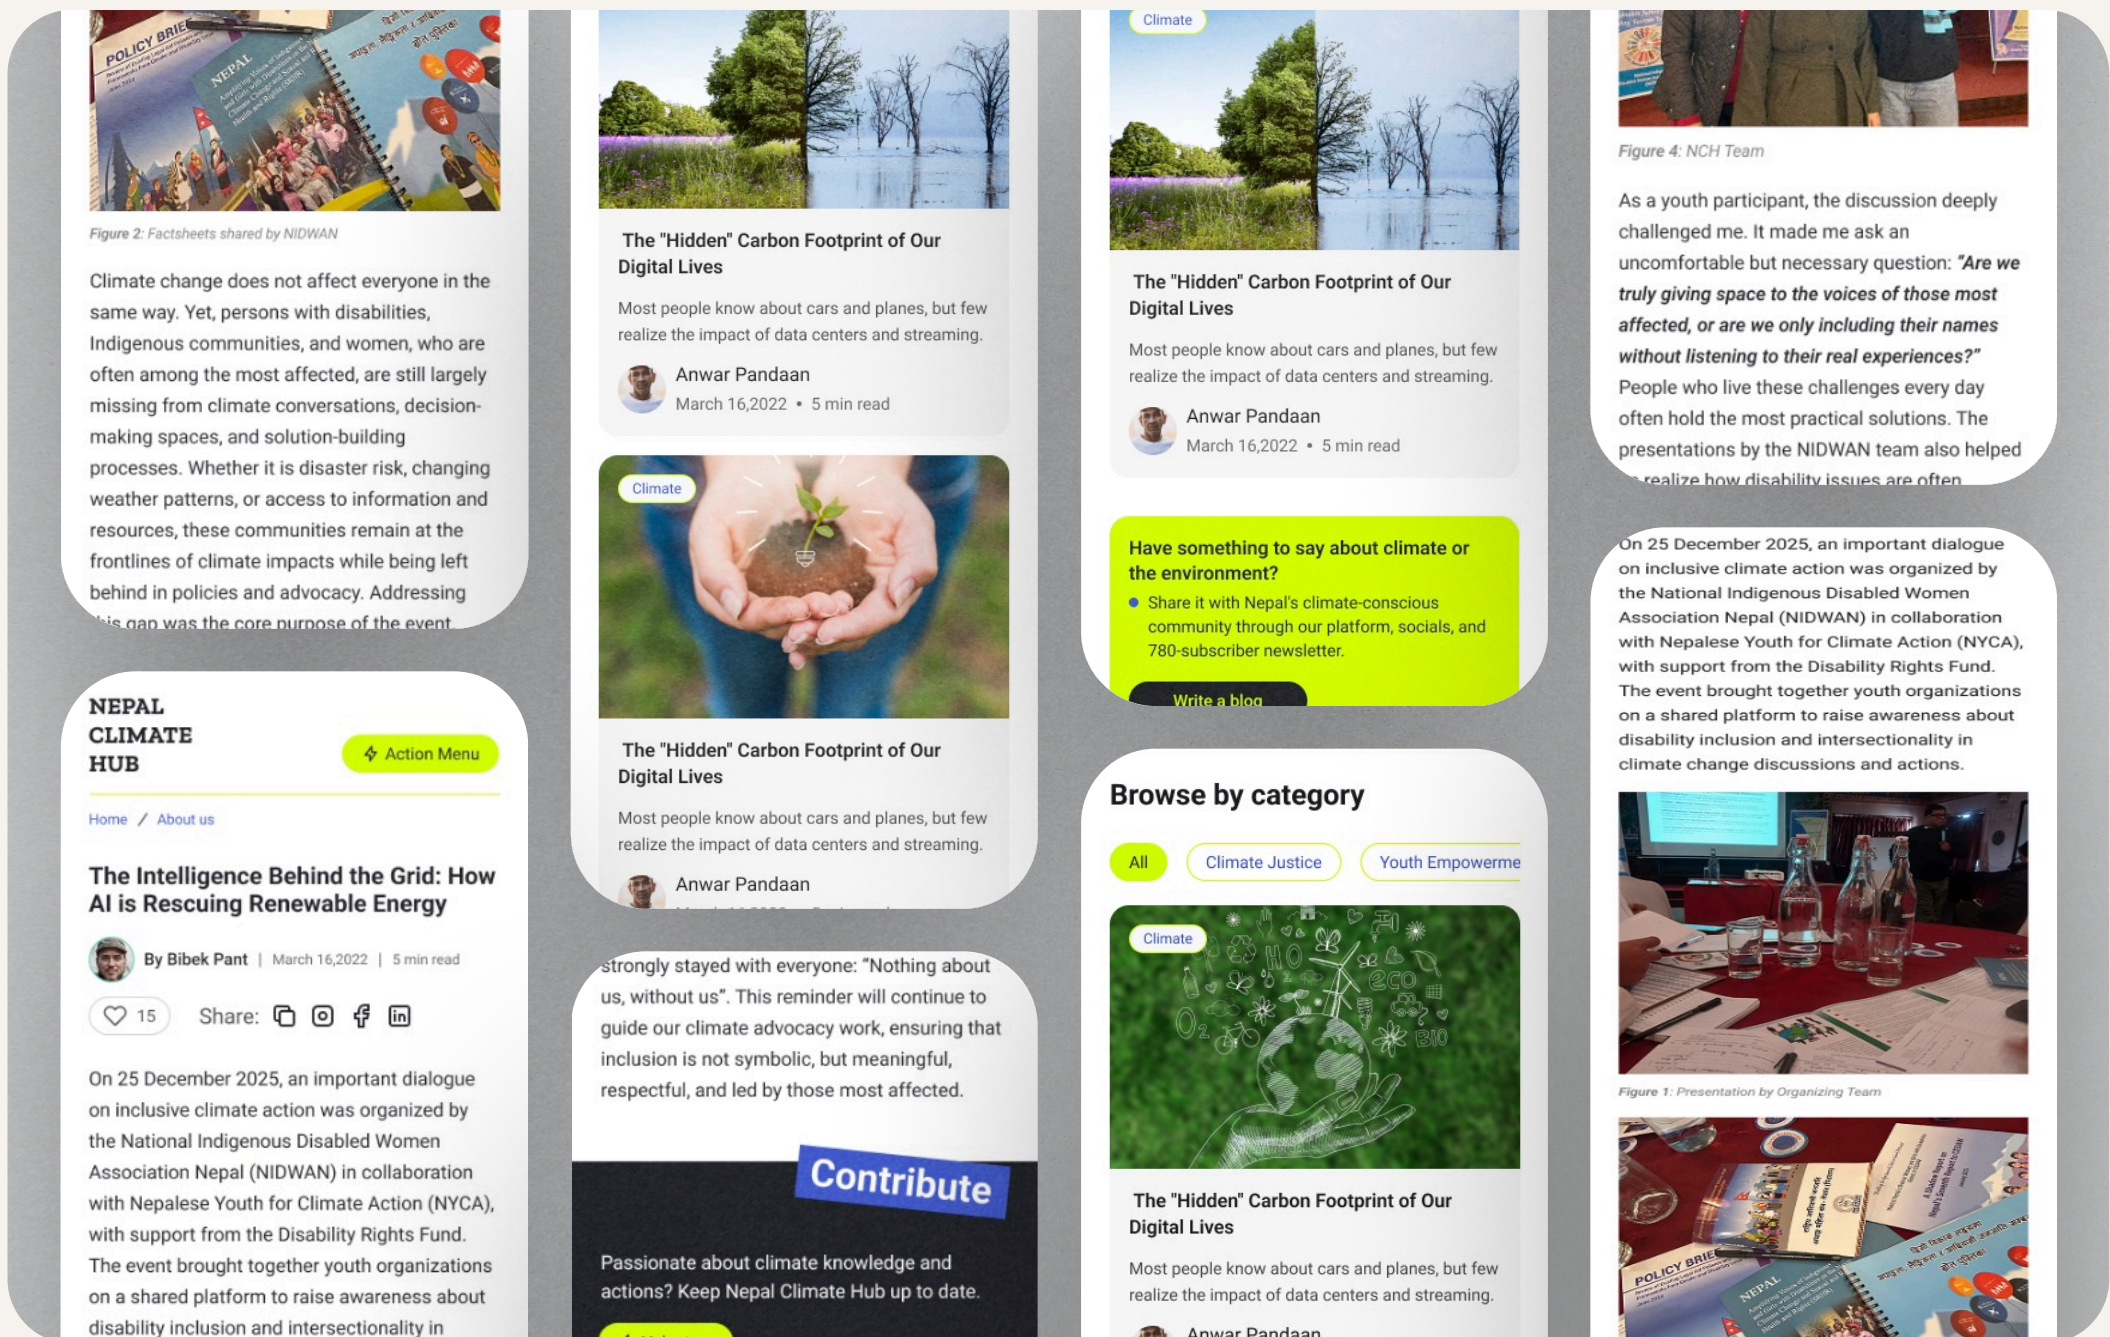

Website Designs

- Designed key pages of the NCH website, including event and program landing pages, and the blog listing and detail templates.
- The focus was on clear information hierarchy, easy navigation, and layouts that build trust and drive action , whether that's registering for an event, applying to a program, or reading a story.

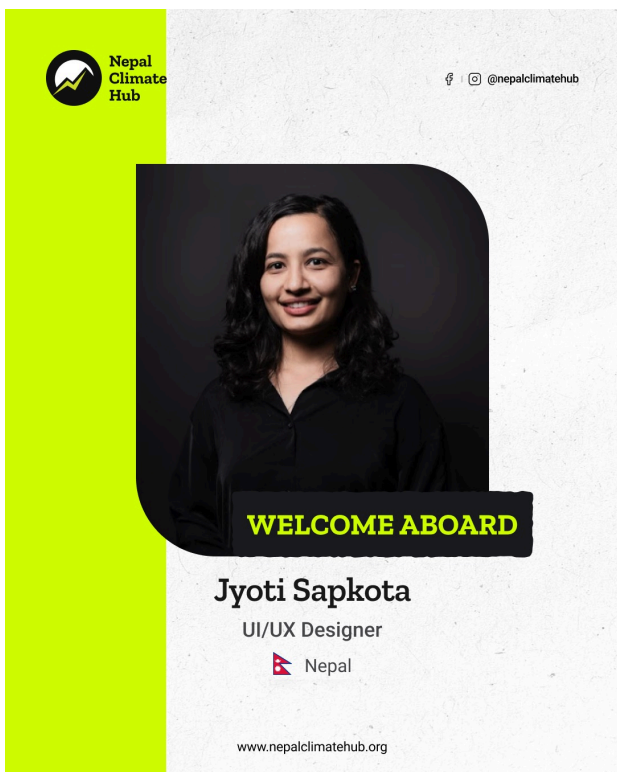

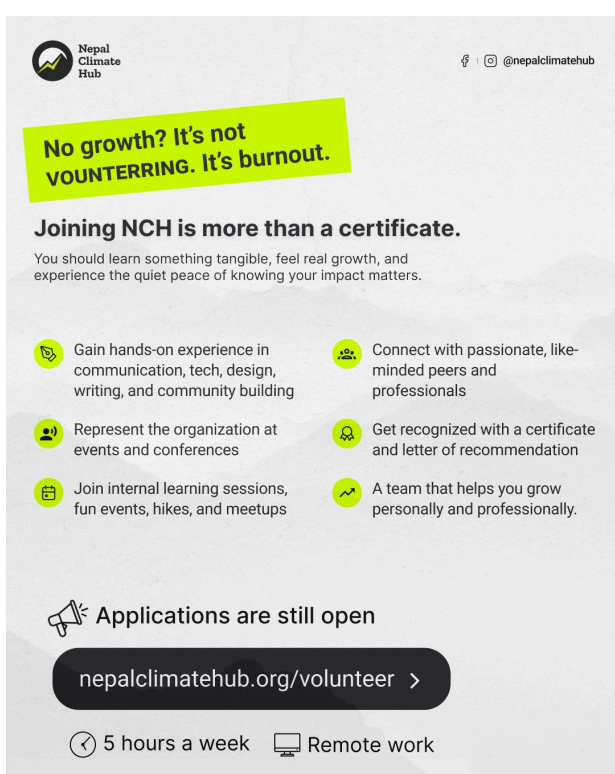

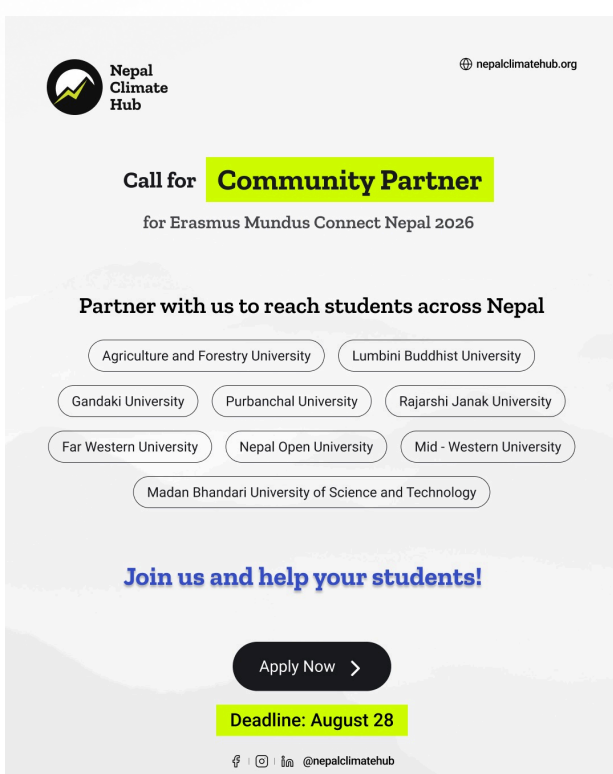

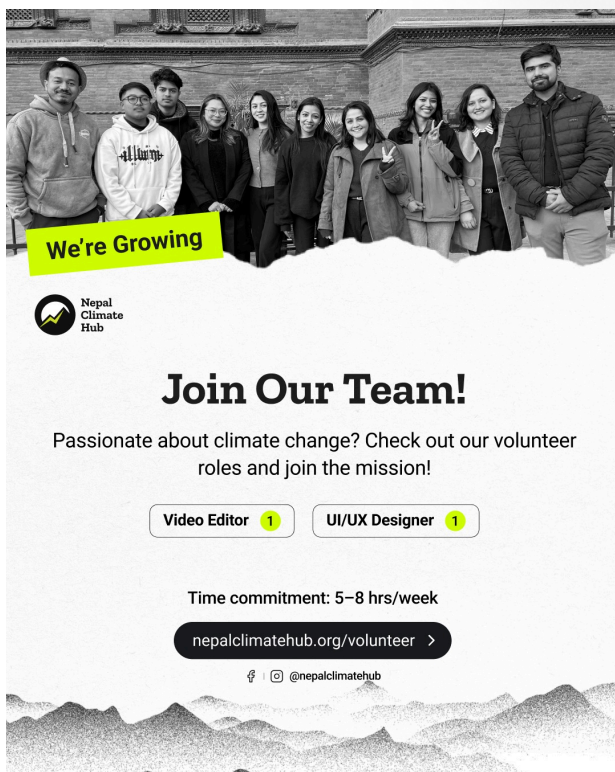

Mobile Designs

Adapted the website's experience for mobile, restructuring content into single-column, thumb-friendly layouts while keeping the same visual language and readability as the desktop site.

Social Media Designs

- Designed a series of Instagram/Facebook creatives to support volunteer recruitment, team spotlights, and event and awareness campaigns.
- Each post uses NCH's signature black-and-lime palette and bold typography to keep the brand instantly recognizable across the feed.

Thank you for your time :)
